DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-17 and 31-35, drawn to an assay device, classified in class 422, subclass 102.
 - II. Claims 18-30, drawn to a method of conducting chemical reactions, classified in class 436, subclass 180.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the device can be used as, for example, an assay wash station.

The method can be practiced by hand.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1743

4. The attempts to reach an attorney of record made in August 2007 to request an oral election to the above restriction requiremen, did not result in an election being made.
